MATH 2350: Calculus III
Section 010, T/Th 9:30–10:50, MATH 112.

Course Information:

Instructor:	Chris Monico
Email:	`c.monico@ttu.edu`
Office:	MA-252
Office Hours:	MW 12:30–3:00, or by appointment.
Required Text:	*Calculus*, Strauss, Bradley and Smith, 5th Ed.

Course outline/Important Dates: We will cover Chapters 10-13 of the textbook.

Exam 1	Thursday, 2/18
Exam 2	Tuesday, 3/18
Last day to drop a course	Wednesday, 3/24.
Last day of classes	Tuesday, 5/4.
Final Exam	**Monday, May 10, 10:30–1:00**.

Calculator policy: Students will be allowed to use calculators on Exams 1 and 2 and the calculator policy for the final exam will be announced in class. But students are expected be able to do all problems without the use of a calculator.

Attendance: Class attendance is *mandatory*. It is assumed that you will attend, so I will not waste your time by taking attendance. However, keep in mind that it will be decidedly difficult for you to pass this course if you do not attend. If you arrive late to class, enter quietly. If you miss a class, it is your responsibility to find out what you missed (assignments, notes,...); either ask a fellow student or come by my office to find out. If you are absent for an exam, you will be permitted to make it up *if and only if* you are absent for one of the following reasons:

- You are out of town performing duties on behalf of the university (i.e., athletics). Advance notification is required.

- Religious holiday (see below).

- **Severe** illness, documented by a physician.

- Death in the family.

- Other extenuating circumstances, at the instructor's discretion (I am *not* very generous with this).

Expected Learning Outcomes Students will

- Apply arithmetic, algebra, geometric, statistical and logical reasoning to solve problems.

- Represent and evaluate basic mathematical and/or logical information numerically, graphically, and symbolically.

- Interpret mathematical and/or logical models such as formulas, graphs, tables and schematics, and draw inference from them.

- Develop skills in differentiation and integration needed to solve problems in 3-dimensional space. In particular, students will master the following concepts:

- tangent and normal vectors, and their geometric and physical interpretations,

- partial derivatives, tangent planes, directional derivatives, and gradients, and how to compute them,

- three-dimensional integration and how to compute such integrals,

- vector fields, divergence, curl, and how to calculate them.

Assessment of learning outcomes The expected learning outcomes for the course will be assessed through scheduled exams and homework assignments. Homework will be assigned regularly (nearly every class meeting) through the WebWork system. Your final grade in this course will be determined by the weighted components and grading scale below.

Grade components

Homework:	25%
Exam 1:	25%
Exam 2:	25%
Final Exam:	25%

Grade Scale

90–100%	A
80–89%	B
65–79%	C
55–64%	D
0–54%	F

ADA Accommodation: Any student who, because of a disability, may require special arrangements in order to meet the course requirements should contact the instructor as soon as possible to make any necessary arrangements. Students should present appropriate verification from AccessTECH. No requirement exists that accommodations be made prior to completion of this approved university procedure.

Religious Holy Day Observance (OP 34.19)

1. "Religious holy day" means a holy day observed by a religion whose places of worship are exempt from property taxation under Texas Tax Code §11.20.

2. A student who intends to observe a religious holy day should make that intention known in writing to the instructor prior to the absence. A student who is absent from classes for the observance of a religious holy day shall be allowed to take an examination or complete an assignment scheduled for that day within a reasonable time after the absence.

3. A student who is excused under Section 2 may not be penalized for the absence; however, the instructor may respond appropriately if the student fails to complete the assignment satisfactorily.
