

What Students Said About My Course

MATH 1451: Calculus I with Applications

Semester Taught: Fall 2013

Student Comments: The following comments come from anonymous student evaluations given at the end of the semester. I have resisted the urge to edit grammar, punctuation, or syntax.

- Higgins is a good Cal Instructor. Her office hours helped to achieve my score I wanted for the class. I hope to have her for Cal 2 effective curriculum effective teacher.
- the instructor did an amazing job encouraging students to think for themselves
- great teacher, however struggles to communicate effectively to all of her students
- the best math teacher/professor I've ever had. Teaches with a passion and helps you understand. Class is hard to have twice a week only but Dr. Higgins is very open to help in office hours
- I enjoy the course despite it being hard. I wish the material could be presented slower
- encourage questions, but very intimidating so I believe students were afraid to ask
