Texas Tech University, Department of Mathematics and Statistics - Fall 2017

COURSE SYLLABUS NUMERICAL ANALYSIS I, MATH 5334-001, CRN 17148

Instructor

Giorgio Bornia, Assistant Professor

Office: MATH 225 Office phone: (806) 834-8754

E-mail: giorgio.bornia@ttu.edu

Office hours: T 11:00am-noon, W 02:00pm-03:50pm, or by appointment.

Website: http://www.math.ttu.edu/~gbornia

Weekly meeting

TR 09:30am-10:50am, room Math 014

Expected Student Learning Outcomes

Upon completion of the two-semester series Math 5334-5335, students should become proficient in the theoretical, analytical, and computational study of numerical analysis. Students should master concepts in computer arithmetic, rounding error analysis, numerical solution of nonlinear equations in one variable, interpolation theory, numerical differentiation, numerical quadrature, numerical linear algebra, approximation theory, direct and iterative methods for solution of linear systems, computational solution of eigenvalues-eigenvectors problems, numerical solution of initial-value differential equation systems, computational solution of systems of nonlinear equations, numerical optimization, and computational solution of boundary-value problems.

Course outline

Textbook: Numerical Mathematics, by A. Quarteroni, R. Sacco and F. Saleri, Springer

Foundations of matrix analysis (Chap. 1)

Principles of Numerical Mathematics (Chap. 2)

Direct Methods for the Solution of Linear Systems (Chap. 3)

Iterative Methods for Solving Linear Systems (Chap. 4)

Approximation of Eigenvalues and Eigenvectors (Chap. 5)

Rootfinding for Nonlinear Equations (Chap. 6)

Assessment of Learning Outcomes

Homework

It will be assigned on a regular basis. It must be completed before the given deadline. Homework is worth 25% of the final grade.

Examinations

- Exam #1: Thursday, September 28, worth 25% of the final grade
- Exam #2: Thursday, November 2, worth 25% of the final grade
- Final Exam: Tuesday, December 12, 7:30 a.m. to 10:00 a.m., room Math 014, worth 25% of the final grade

Use of calculators in all the exams is not permitted. Electronic devices which can store formulas, including cell phones, must be turned off and stored during the exams. The instructor will specify what topics must be studied for each exam.

Grading Policy

Let g be the grade in percent: g < 39 F, $40 \le g < 59$ C, $60 \le g < 79$ B, $80 \le g < 97$ A, $97 \le g$ A+

The grading policy may be subject to slight adjustments depending on the achievements of the students.

Make-ups

There are usually no make-ups for the examinations, except for reasons of illness, stated in writing by a medical doctor, or observance of a religious holiday, or other very reasonable motivations.

Class Policies

Attendance is mandatory. If students miss a class, it is their responsibility to find out what they missed (announcements, assignments, notes ...). Also, it is their responsibility to frequently check their e-mail for announcements made by the instructor. Students are encouraged to read each section of the textbook in advance of the lecture.

Classes start and end always on time. Students are not allowed to leave the class before the end of the hour without authorization. During class time it is not allowed to text, chat and sleep. All electronic devices must be put in silent mode.

TTU Operating Policies

Americans with Disabilities Act (TTU OP 34.22)

Any student who, because of a disability, may require some special arrangements in order to meet course requirements should contact the instructor as soon as possible to make any necessary arrangements. Students should present appropriate verification from Student Disability Services, during the instructor's office hours. Please note instructors are not allowed to provide classroom accommodations to student until appropriate verification from Student Disability Services has been provided. For additional information, you may contact the Student Disability Services office at 335 West Hall or 806-742-2405.

Absence for observance of a religious holy day (TTU OP 34.19)

1. "Religious holy day" means a holy day observed by a religion whose places of worship are exempt from property taxation under Texas Tax Code 11.20. 2. A student who intends to observe a religious holy day should make that intention known to the instructor prior to the absence. A student who is absent from classes for the observance of a religious holy day shall be allowed to take an examination or complete an assignment scheduled for that day within a reasonable time after the absence. 3. A student who is excused under Section 2 may not be penalized for the absence; however, the instructor may respond appropriately if the student fails to complete the assignment satisfactorily.

Academic Honesty (TTU OP 34.12)

It is the aim of the faculty of Texas Tech University to foster a spirit of complete honesty and high standard of integrity. The attempt of students to present as their own any work not honestly performed is regarded by the faculty and administration as a most serious offense and renders the offenders liable to serious consequences, possibly suspension. "Scholastic dishonesty" includes, but it not limited to, cheating, plagiarism, collusion, falsifying academic records, misrepresenting facts, and any act designed to give unfair academic advantage to the student (such as, but not limited to, submission of essentially the same written assignment for two courses without the prior permission of the instructor) or the attempt to commit such an act.

The grade of "I" (TTU OP 34.12)

The grade of "I" is given only when a student's work is satisfactory but, due to reasons beyond his or her control, cannot be completed. It is not given in lieu of an "F" or "W". The instructor assigning the grade will stipulate in writing at the time the grade is given the conditions under which the "I" may be removed. The assigned work and a change of grade must be recorded within one calendar year from the date of the "I". Failure to do so results in an "F" for that course.
