

TEXT: *Calculus*, 2nd Ed., Smith and Minton, McGraw-Hill.

SCHEDULE: Unless announced otherwise in all sections, all topics listed herein will be possible topics on the common final. However, the daily schedule in your section could well be different from that listed below.

DAILY WORK: Do the reading from the sections to be covered before coming to class each day. Your instructor will be planning class activities assuming you have done the reading. The exercises suggested below represent a minimal assignment and should also be done as the material is covered. Some students may have to work additional exercises from the text to attain sufficient mastery of the material.

OTHER ASSIGNMENTS: Your instructor may assign a group project or other take-home work for grade. Your instructor may collect homework, give quizzes, or schedule exams on dates other than than those given below.

CALCULATORS: You will not be permitted to use any calculator on the final exam. Your instructor will decide whether or not calculators are allowed on hour exams.

FINAL EXAM: The time for the final exam is 6:00-8:00 pm, Wednesday, May 3, Room TBA. You are expected to arrange your personal and work schedule to allow you to take the exam at the scheduled time. Students with conflicting exam schedules may be allowed to take an alternate final, which is always given after the regularly scheduled final. No student will be allowed to take the final exam early. A picture ID (driver's license or student ID) is required to take the final exam.

ADVANCED PLACEMENT: If this is the first college mathematics course that you have attempted, then you may be eligible for 10 hours of free credit for Math 106 and Math 107, provided you earn a grade of P, C or better in Math 208 this semester. To be considered for this credit, you should register with the Department of Mathematics, 203 Avery Hall, by Friday, February 10, 2006.
