Moving the head: The Donderian way

Bijoy K. Ghosh, Texas Tech University

Wednesday, November 3, 2010

Room: MATH 014. Time: 4:00pm.

ABSTRACT. In this talk we will apply the Donder's law to study the optimal human head movement problem. Donder's law generalizes the well known Listing's law that pertains to the eye movement problem. Various special cases using collected data of head movement will be considered.
